- 1. The Mifem Metal Processing Works (Mosonmagyarovari Femfeldolgozo NV) at 9 Lajtasz Street in Mosormagyarovar (P 48/Y lo) was located southwest of the Lajta River and was a nationalized plant which had formerly produced sporting cartridges, detonators and metal goods.
- 2. The plant consisted of departments including a pencil producing department, a copper cutting department, an aluminum and an iron cutting department, a foundry, a pressing department, a bar drawing mill, a gas hearth producing department, a gas meter producing department, an electrolytic oxidation department, a tinsmith's workshop, a machine repairing shop and a tool workshop. It was equipped with machinery mainly of German make and was supplied with current by the Banhida (Q 48/Y 94) power station or its own generating plant which was overhauled in January 1952 and was capable to cover the plant's demand and that of the town.
- 3. The plant produced gas hearths, gas meters, propelling pencils, greasing implements for machines and V-19-type mine detonators. The production of V-19-type mine detonators which had started in January 1952 and amounted to about 1,200 detonators per month involved more and more departments of the plant with a view to reach a monthly output of 5,000 detonators and to gradually abandon the production of all other articles. The works produced products of good quality and, in 1951, was awarded the first price for factories of the third category in a quality competition. Source was not in a position to give information on the origin of the raw materials.
- 4. The plant had a working staff of about 1,200 to 1,300 persons including about 750 women. The iron and aluminum cutting department worked in three shifts, the copper cutting department and the bar drawing mill in two shifts and all other departments in one shift.
- 5. The leading staff of the plant consisted of persons including Ernoe Kertesz, serving as general manager of the plant, who was about 40 years old, 160 cm wall, had black hair and was a former mechanic; Leiczinger (fnu), serving as technical manager, who was about 36 to 38 years old, 170 cm tall, slender, had a lean pock-marked face, brown hair and was a former laborer; Viktor Godo, terving as chief engineer of the technical department, who was about 28 years

~ 2 ~

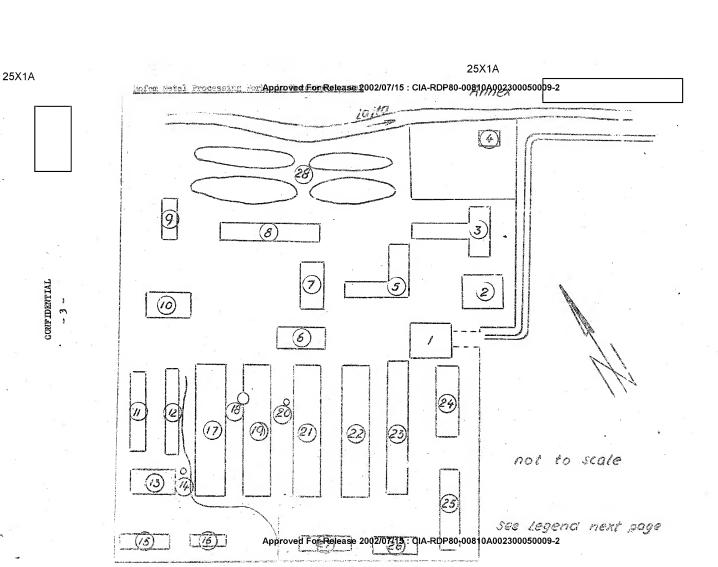

old, 175 cm tall, had a round face and brown hair; Maria Molnar, serving as chief of the personnel department, who was about 38 years old, had a round face, black hair and was slender; Antal Vitez, serving as MDP secretary, who was 33 years old, 168 cm tall, slender, and was a former foundry moulder; Mihaly Prejer, serving as secretary of the works council, who was about 26 years old, 165 cm tall, had a longish face, fair hair, and was a former lathe operator; Laszlo Csapo, serving as chief of the labor department, who was about 38 years old, 180 cm tall, slender, had a longish face, brown bair, and was a former joiner. No Soviet specialists or deportees were employed in the plant.

6. It was rumored among the working staff that the whole plant was to be transferred to the interior of the country. Old lathes were, however, still mounted in the plant.

	of Bad Freienwalde and proceeding toward Ferlin. On 20 July, a column of 10 trucks towing 120-mm mortars, 2 closed trucks, 1 field kitchen and about 110 troops wearing red-bordered black epaulets was seen en route to the Eberswalde railroad station, coming from the direction of the barracks installations.	25X1C
	On 21 July, a column of 10 trucks with covered numbers and towing 8 x 85-mm AA guns; and about 100 troops wearing red-bordered black epaulets with artillery insignia was seen en route to the railroad station, coming from the direction of the barracks installations. On 18 July, a train of 25	
	flatears with sideracks, carrying 9 x 85-mm AA guns and 15 trucks; and 7	
	boxcars, occupied by about 200 troops wearing red-bordered black epaulets, was seen en route toward Ead Freienwalde, coming from the direction of Eberswalde. At about 8:15 a.m. on 23 July, a freight train, which included	
	flatcars with sideracks carrying nine factory-new rocket launchers without numbers, was seen en route toward Eberswalde, coming from the direction of	
	Bad Freienwalde. 2 At about 8:15 a.m. on 26 July, two flatcars with sideracks carrying T-34 tanks which went in the same direction.	
_		
<b>ن</b> و	On 18 July, the Schuetzen Kaserne in Eberswalde was occupied by about 3,000 troops wearing red-bordered black epaulets with tank and signal insignia. Between 5 and 18 July, about 150 troops at drill and 15 x 132-mm rocket	
Г	launchers were seen in the barracks yard on several days.	25X1C
L		5.
6.	On 18 July, the Artillerie Kaserne was occupied by about 3,500 troops wearing red-bordered black epaulets with tank and artillery insignia. Tanks and SP guns were seen in the barracks area. Intensive activity was observed in the barracks buildings and the barracks yard.	
7.	On 24 July, the cantonment on Breitscheid Strasse was occupied by about 250 troops wearing black-bordered black epaulets with signal insignia. On 22 July, troops seen in the barracks area were engaged in physical training and drill.	
8.	At about 2 p.m. on 27 July, three motorboats were loaded on four flatcars with sideracks at the Eberswalde freight station. The escorting personnel wore black-bordered black epaulets.	25X1X
9.	On 31 July, 20 x 132-mm rocket launchers, 10 trucks with numbers of the E 1-02-xx series, 1 field kitchen and 160 troops wearing red-bordered black epaulets were entrained in Eberswalde. 3	
LO.	On 27 July, three assault boats were entrained in Eberswalde and left toward	
	north. 3	
1.	Comment. The information does not indicate major changes in the occupation of the barracks installations mentioned over the preceding report of early July. See The occupation strength of the cantonment on Breitscheidstrasse, mentioned in paragraph3, is highly exaggerated, whereas that in paragraph 7 checks with previous information.	÷

SECRET 25X1A 25X1A Comment. The shipments and novements observed are commented on as follows: 11 July Probably entraining of a unit of the 312th Gds RI Regt of the Yourth Gds Meez Army for Altengrabow. This unit, according to remorts on transportation, returned from Altengrabow to Eberswalde on 24 July under shipment-record No 61331. 12 July Entraining of units of the 63d ASA Dlv (UE), presumably for Wustrou. Another source, on the same day. reported the entraining of 25X1A Light AA guns in Eberswelde, See L 25X1C the column belonged to the 6th Gds Necz Div and presumably involved elements of the division from Bad Freienwalde, which transferred to Ferlin by road, The composition of the column, however, contradicts this assumption to some extent, as the 240th Cds Nort Reg! of the division is believed stationed in Eberswalde. 18 July. Possibly a shipment of AAA units of the air force, which, according to reports on transportation, went from Wastrow to Welzow on 18 July under 25X1C shipment-record No 61866. 21 July Possibly a shipment of units of the 63d AAA Div (US) to Vustrow. This shipment of nine rocket launchers had been observed in Frankfurt/Oder as early as 22 July. 25X1A Comment. Equipment of the 3d Engr Regt of the Fourth Gds Mecz Army was presumably entrained on 27 July. On 31 July, the entraining possibly involved units of the 312th Gds RL Regt of the Fourth Gds Mecz Army, which went to a training grounds for firing practices. 25X1C 25X1C
